

Peyote Tapestry Holder

The Peyote Tapestry Holder is a practical tool to hold a Peyote Tapestry project with Miyuki Delicas. There are three different sizes that can hold a Peyote Tapestry up to 90, 120 or 200 columns.

When the Peyote Tapestry gets bigger, it is increasingly difficult to handle. This holder rolls up the tapestry and with an elastic band it is secured. It is much easier to locate the beads with the needle.

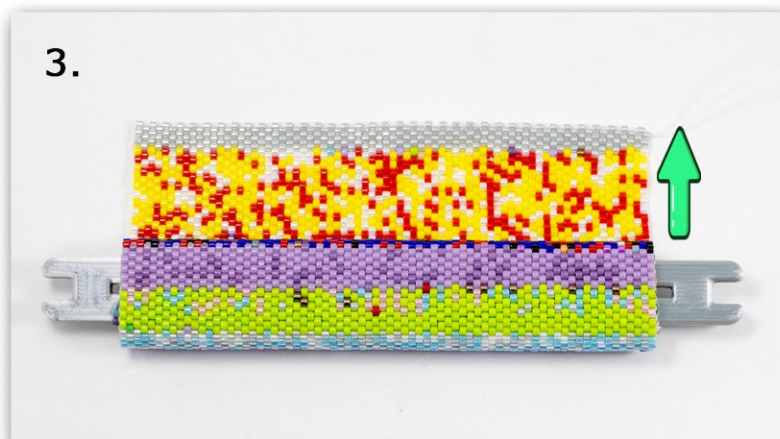

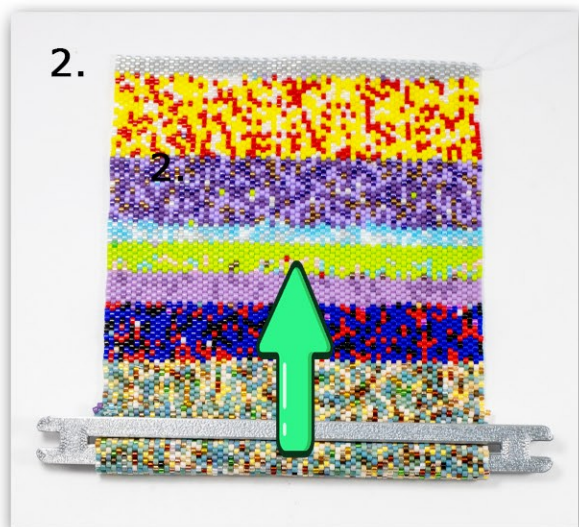

1. Slide the Peyote Tapestry through the slot in the Holder.

2. Roll up the tapestry with the Holder.

3. Be sure to leave about 2 cm (0.80 inch) to work with. You can freely move the needle and stabilize the tapestry with the other hand.

4. Use the elastic band and the 2 indentations to secure the tapestry.

Your Tapestry Holder is now ready to use. Happy Beading!
